Network Enabled

Cost Effective

With a 550 mm (21.7 inches) wide by 850 mm (33.5 inches) high tunnel opening and a low conveyor, the **Rapiscan 624XR** is designed for easy loading and unloading of upright baggage. The 624XR's dual-energy detection provides automatic color coding of materials so that screeners can identify the material composition of a scanned object, while its compact footprint allows customers to make the most of the available space at a checkpoint.

Like all systems in the 600 series family of X-ray scanning solutions, the Rapiscan 624XR is built on a standardized platform that makes it easy to install and maintain, and comes with features such as dual-energy detection, a streamlined, ergonomic design, and Rapiscan's feature-rich OS600 system software.

Feature & Option Highlights

OS600 System Software:

Rapiscan's OS600 software provides an intuitive Graphical User Interface with improved image quality as well as advanced networking capabilities.

Threat Image Projection (TIP): TIP inserts digital threat images at configurable frequencies into the regular flow of bags. TIP is the preferred operator performance measurement and training method used by regulatory agencies worldwide.

Threat Image Projection Network (TIPNET): TIPNET is a secure, high speed network that links all TIP enabled systems to a central station.

Target: Target™ is Rapiscan's innovative automatic threat and contraband detection technology. Target's software algorithms search X-ray images for targeted materials by analyzing the mass, size and atomic number of items in the image.

Operator Training Program (OTP): OTP is an easy-to-use software application that helps users learn key system features and functionality.

Density Threshold Alert (DTA): DTA generates a visible alarm when an imaged object exceeds a user-specified density threshold.
