## Feature & Option Highlights

### OS600 System Software:

Rapiscan's OS600 software provides an intuitive Graphical User Interface with improved image quality as well as advanced networking capabilities.

**Threat Image Projection (TIP):** TIP inserts digital threat images at configurable frequencies into the regular flow of bags. TIP is the preferred operator performance measurement and training method used by regulatory agencies worldwide.

**Threat Image Projection Network (TIPNET):** TIPNET is a secure, high speed network that links all TIP enabled systems to a central station.

**Target:** Target is Rapiscan's innovative automatic threat and contraband detection technology. Target's software algorithms search X-ray images for targeted materials by analyzing the mass, size and atomic number of items in the image.

**Operator Training Program (OTP):** OTP is an easy-to-use software application that helps users learn key system features and functionality.

**Density Threshold Alert (DTA):** DTA generates a visible alarm when an imaged object exceeds a user-specified density threshold.
