## BAGGAGE AND PARCEL INSPECTION

### Large Parcel and Small Cargo Screening

### Dual View

### Easy Loading Conveyor

### Complex Parcels

With a 1,000 mm (39.4 inches) wide by 1,000 mm (39.4 inches) high tunnel opening, the **Rapiscan 628DV** is designed for customers that need to inspect small cargo as well as baggage and large parcels.

Rapiscan 628DV (Dual View) provides a horizontal and vertical view of the object under inspection to improve throughput and object discrimination. These two perpendicular views provide a complete perspective of complex parcels regardless of their orientation in the X-ray system. Dual view technology eliminates the need for screeners to reposition and re-scan parcels in high security environments.

Like all systems in the 600 series family of X-ray scanning solutions, the Rapiscan 628DV is built on a standardized platform that makes it easy to install and maintain, and comes with features such as dual-energy detection, a streamlined, ergonomic design, and Rapiscan's feature-rich OS600 system software.

### Feature & Option Highlights

**OS600 System Software:** Rapiscan's OS600 software provides an intuitive Graphical User Interface with improved image quality as well as advanced networking capabilities.

**Threat Image Projection (TIP):** TIP inserts digital threat images at configurable frequencies into the regular flow of bags. TIP is the preferred operator performance measurement and training method used by regulatory agencies worldwide.

**Threat Image Projection Network (TIPNET):** TIPNET is a secure, high speed network that links all TIP enabled systems to a central station.

**Target:** Target™ is Rapiscan's innovative automatic threat and contraband detection technology. Target's software algorithms search X-ray images for targeted materials by analyzing the mass, size and atomic number of items in the image.

**Operator Training Program (OTP):** OTP is an easy-to-use software application that helps users learn key system features and functionality.

**Density Threshold Alert (DTA):** DTA generates a visible alarm when an imaged object exceeds a user-specified density threshold.
